

# MANITOBA EDUCATION

## ICAB UPDATES

TVLC/HSAP REPORT-FEB/MARCH

### ➤ **2020-21 Subject Table Handbook is now available:**

- Again, a new, modernized version of the Technology Education Subject Table Handbook is available at <https://www.edu.gov.mb.ca/k12/docs/policy/sthte/index.html>. Please feel free to contact us if you would like to see any added information or resources to this version of the subject table handbook.
- This new format contains additional information regarding Technology Education and the on-line version allows you to click a direct link to the curriculum and other resources.
- Please be sure to review the handbooks for accuracy of course codes for the 2020-21 school year. Particular attention is required with new course codes to avoid duplication of a similar course.
- Pre-authorization is required if you are planning to offer a new courses from the Technology Education Subject Table Handbook. This is to ensure that schools understand the criteria required when offering these courses and to ensure schools are included in the Technology Education Funding formula.

### ➤ **SSEEF:**

- Manitoba Education is pleased to announce that the 1.5M Skills Strategy Equipment Enhancement Fund is available for the 2020-21 school year to support equipment purchases for Technical Vocational Education Programming and Industrial Arts programming in Manitoba. New grant applications will be posted soon on the Technology Education website and will be due on May 15, 2020.

### ➤ **Ongoing Items and collaboration work:**

- Manitoba Education, SAFE Work Manitoba and SAFE Workers of Tomorrow have been working together to help prepare Manitoba students for safe work experiences by assisting school division administration with Workplace Safety and Health roles and responsibilities. A *Safety Plan Development Session for Student Work Experiences* was held on November 15, 2019 for school division administration teams to introduce the new Safety Plan Framework. This Framework will provide School Divisions the key components and guidelines to developing a division plan for student safety for student work experiences.
- Resources are posted on Maple and the Technology Education and Career Education websites.

- The resources will consist of all the power points and documents shared at the workshop including the documents provided by SAFE Work Manitoba, SAFE Workers of Tomorrow and Pembina Trails School Division who shared their school division resources. The working group appreciates your feedback from the session and your continued work on helping prepare students for safe work experiences.

➤ **Manitoba Education HSAP Webpage:**

- We are looking for feedback for the reimagining of the Manitoba Education HSAP webpage. Please note: This is only the link from the Technology Education webpage not the Apprenticeship Manitoba page. Here are some of the suggestions we have received so far. Please let us know the type of information, forms, links, contacts, and resources you feel would benefit educators, parents and students by visiting the new webpage. Please provide your feedback by emailing Kim Poirier at [Kim.Poirier@gov.mb.ca](mailto:Kim.Poirier@gov.mb.ca).
