

The Piping Trades program is an 8 credit program offered in two semesters. This program provides a foundation for students to go directly into work, continue their post-secondary education in the Piping Trades, steamfitter, sprinkler fitter, HVAC technician, gas fitter, plumber, petroleum technician, pipeline worker, building maintenance, power engineer controls technician, instrument fitter, oilfield worker, fabrication worker, rigger and waste water technician.

Completion of training in this program will improve student's chances of locating employment as an apprentice in the Piping Trades field. Students who have completed section A and B with an accumulated average of 70% or higher may be eligible for their Level 1 Apprenticeship training in the Plumbing trade. Additional practical training hours can be acquired through the High School Apprenticeship Program (HSAP) – a high school evening/weekend/summer work practicum recognized Apprenticeship MB.

Section A

8876 Introduction to Plumbing Pipe Trades 20S
8877 Introduction to Piping Systems and Theories 30S
8878 Installation of Plumbing and Piping Systems I 30S
8879 Installation of Plumbing and Piping Systems II 30S

Section B

8981 Sanitary Venting Systems 40S
8982 Sanitary Drainage Systems 40S
8984 Installation of Plumbing and Piping Systems III 40S
8985 Applied Plumbing and Piping Systems 40S
