

## High School Apprenticeship Program

This program allows students to start an apprenticeship program while still in high school. It links high school instruction with paid, part-time, on-the-job apprenticeship training. Students need a qualified and insured employer who will hire them and train them as an apprentice. Students will earn one credit for every 110 hours of apprenticeship training, to a maximum of eight credits. Students will be paid a trade-specific rate and may apply their on-the-job hours to full-time apprenticeship training after graduation. Working hours can be scheduled to include evenings, weekends and summer break. The HSAP is an excellent way for student to increase their 1) personal employability skills, 2) work-world essential skills, 3) technical trade knowledge, and 4) technical trade skills.

For more information, talk to your school guidance counsellor or contact the High School Apprenticeship Instructor at 204-304-0985 or 204-319-0711

### Benefits of the HSAP

- earn up to eight supplemental academic credits for graduation
- be paid more than minimum wage
- credits received may pay for postsecondary training
- use this work experience to get a full-time job
- apply your on-the-job hours to full-time apprenticeship training after graduation

You have access to career opportunities in almost 60 trades. For a more complete listing of eligible trades refer to Manitoba Trades:
